PRESS RELEASE

September 22, 2026

Jason Andre Joins ELLWOOD Aluminum as Production Control Director

Hubbard, Ohio – ELLWOOD Aluminum, a manufacturer of large-diameter aluminum ingots, billets, rectangular slabs, and cast plates, has welcomed Jason Andre as Production Control Director to its team to oversee scheduling, inventory, and production efficiency.

Andre is a graduate of Youngstown State University, where he earned his Bachelor of Engineering in Industrial & Systems Engineering, followed by his Master's of Business Administration in Organizational Leadership. In his new role, he will oversee and manage production planning, scheduling, inventory management, materials planning, warehousing, logistics, and the procurement of raw materials to support operations.

During his free time away from ELLWOOD Aluminum, Andre enjoys staying active by hiking and playing rounds of golf. He and his wife, Shannon, are also passionate about supporting high school sports in their hometown of Liberty.

"I am eager to take on this role and lead the efforts in streamlining our operations at ELLWOOD Aluminum," said Andre, Production Control Director of ELLWOOD Aluminum. "My focus will be on keeping operations running smoothly and efficiently while continuing to deliver exceptional aluminum products to the customers."

Using vertical direct chill casting technology and a fully equipped lab, ELLWOOD Aluminum has the capacity for casting, processing, and quality monitoring of large aluminum ingots in round and rectangular shapes. With dedicated melting and holding furnaces plus a casting pit capable of lengths up to 360 inches, they can meet any customer specifications to serve as a true partner. The company prides itself on manufacturing quality aluminum ingots, billets, slabs, and cast plates used in industries such as aerospace, defense, automotive, and tooling.
