ELLWOOD ALUMINUM ANNOUNCES AS9100:2016 CERTIFICATION

August 17, 2021 – Hubbard, OH – ELLWOOD Aluminum, a large diameter aluminum ingot and billet, rectangular slab, and cast plate manufacturer, announces that they have earned AS9100:2016 Certification.

AS9100:2016 is the newest aerospace standard and is based on the ISO 9001:2015 quality system requirements. AS9100 series is the industry-recognized set of standards for quality assurance and risk management. The standards were developed for organizations that work within the design, development, production, installation, and servicing in the Aviation, Space, and Defense (ASD) sector.

The AS9100 Certification asserts that ELLWOOD Aluminum provides the highest quality aluminum alloys, such as the EIICast5™ (Alloy 5083 type) and EIICast2™ (Alloy 2618 type) for ingots, billets, slabs, and cast plates used to manufacture material for the aerospace industry. They also offer custom aluminum cuts with responsive customer service, metallurgical support, and inventory management options for other industries including transportation, automotive, trucking, packaging, and tooling.

“We are proud to announce our AS9100 Certification at our Hubbard facility,” stated Dr. Patrick Callihan, President of ELLWOOD Aluminum. “We owe this achievement to our outstanding team for working to meet strong certification guidelines and quality assurance for the aerospace industry.”

Using Vertical Direct Chill casting technology and a fully equipped lab, ELLWOOD Aluminum has capabilities for casting, processing, and quality monitoring of large aluminum ingots in round and rectangular aluminum slabs in 2XXX, 6XXX, and 7XXX series alloys. With dedicated melting and holding furnaces with a casting pit capable of lengths up to 360 inches, ELLWOOD Aluminum can meet any customer specifications and be a true partner to them. They pride themselves on producing quality aluminum ingots, billets, slabs, and cast plates that are used in industries such as aerospace, defense, automotive, and tooling.
